

Hepatitis ----- virus also called the delta agent.

A Hepatitis B

B Hepatitis A

C Hepatitis C

D Hepatitis D

Herpes simplex virus is a(n) (RNA/DNA) -----
- virus.

A DNA

B RNA

The varicella vaccine used for routine immunization against varicella zoster virus is a (killed/live attenuated) ----- vaccine.

A killed

B live attenuated

----- is the main method of spread of herpes simplex type 2 virus in adults.

A saliva

B sexual contact

Herpes simplex virus-2, which causes herpes genitalis, stays latent in ----- .

A trigeminal nerve ganglia

B sacral ganglia

Is caused by ?

- A Gram negative, intracellular, coccobacillus
- B Nonenveloped, single-stranded, positive-sense RNA virus
- C Non-enveloped, double-stranded, DNA virus

Hepatitis D virus (HDV) is transmitted by blood (transfusion, injection drug use, needle-stick injuries), mother-to-child, sexual, organ transplant patients, hemodialysis patients.

A TRUE

B FALSE

Varicella zoster virus is an (enveloped/non-enveloped) ----- DNA virus.

A non-enveloped

B enveloped

Hepatitis ----- virus IS double stranded DNA
enveloped

A Hepatitis A virus

B Hepatitis D virus

C Hepatitis E virus

D Hepatitis B virus

E Hepatitis C virus

Rhinoviruses (do/do not) ----- have an envelope, like all picornaviruses.

A DO NOT

B DO
